Professional Summary

Frontend developer specializing in fast, scalable web and mobile applications using React, Next.js, and React Native. Proven ability to deliver production-ready features that enhance performance, user experience, and engagement. Strong focus on clean architecture and responsive design across platforms. Passionate about building user-centric digital products with modern frontend technologies.

Work Experience

Cosonas, Frontend Engineer (Remote, UK)

Tech Stack: TypeScript, React Native, Next.js, Expo, Tailwind CSS, Figma

- Built and shipped cross-platform features using React Native and Expo, including mobile authentication, form validation, and adaptive UI components.
- Integrated responsive design systems and component libraries using Tailwind CSS and Figma handoffs, resulting in cleaner UIs and better design-dev collaboration.

Loger Limited, Frontend Developer (Contract) (Remote, NG) ☑ Tech Stack: React, TypeScript, Next.js, Figma

- Developed and maintained an admin rental dashboard for tenants and agents to manage property listings, bookings, and payments within a scoped monorepo environment.
- Integrated REST and GraphQL APIs with dynamic state management using Vuex, ensuring smooth data flow and error handling.
- Optimized performance with server-side rendering (SSR), lazy loading, and efficient resource handling, resulting in a 25% drop in bounce rate.

Purscliq Technology Limited, Frontend Developer (Onsite, NG) ☑

- Developed a fintech web dashboard for gift card transactions and user wallets
- Converted 20+ screens from Figma to responsive React layouts using Next.js
